Q1: Terms

1-1 **Tribe owner** who has created this tribe.

- Yes.

Is there another way to become a tribe owner except for creating tribe?

- Yes, if they make someone else the tribe owner, i.e., pass the rights to someone else.

If so, in which screen can the tribe owner pass the rights to somebody else?

1-2 **Project leader** who has created this project. - Yes

Is there another way to become a project leader except for creating project? – Yes, if they make someone else the tribe owner, i.e., pass the rights to someone else.

If so, in which screen can the project leader pass the rights to somebody else?

Q2: Project List (1)

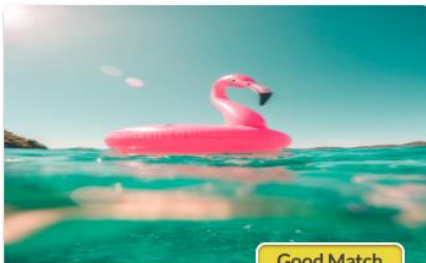

2-1 Is it possible to click 'create project' on project list page? I mean creating project needs to be in a tribe detail. Before knowing the tribe which can be one of project, we may not create a project. Anyway if you want to create a project in project list page, you need to lead to a selecting tribe page or you need to add a tribe field on creating project page...

We all know the importance of technology the joy of reading a book.

Q3: Project List (2)

3-1 I don't understand the count of tribes at 'X Volunteers from 3 Tribes'

Project may have several members.

Each member belongs to several tribes.

So how can I determine the count of tribes at a project?

3-2 does each project have start time and end time?

Does each project have status like ongoing and what else?

Can I see the start time, end time, ongoing in project create page?

Q4: Project Detail (1)

4-1 These two designs are for 'project details'. What are different from each other?

I think left one is for guest who doesn't sign up and right one is for project member and project leader.

Right? – **Correct**

If so, in right screen, what's the difference from project member and leader? Maybe leader can see 'manage project' button and 'You are a **leader** of this Project'; and member only can see 'You are a **member** of this project'. Right?

Thanks for reviewing my questions.
